

# ViniClip

Won't let you down

**STRONGEST & LONGEST LASTING**  
**CLIP ON THE MARKET SPECIALLY**  
**DEVELOPED FOR THE VITICULTURE**  
**TRELLIS INDUSTRY. PROVIDING**  
**POSITIVE WIRE TO POST FASTENING.**

- ✓ Cost effective wire to post fastening.
- ✓ Will not dislodge when harvesting and pruning.
- ✓ Self drilling screws or nail fastening options in both single and double clips.
- ✓ Wires can be easily adjusted up and down the post as vines grow by unclipping and lifting wire.
- ✓ **Vini-Clips** are moulded from UV stabilised polyethylene plastic, capable of resisting extreme temperatures.
- ✓ Screw pull out loads far exceeds those of nails and staples, eliminating costly repairs.
- ✓ By design the load is carried by the screw rather than the clip.

**TEK SCREW**  
**12 Gauge Galvanised**  
**55mm/65mm**

MADE IN  
AUSTRALIA

## Testimonials

We have used **Vini-Clips** for over 15 years and would have used 90000 plus, across 15 hectares of vineyard. They are excellent to use and they make the process of lifting and dropping removable foliage wires quick and easy. They are also great on the bottom of the trellis posts, so that when foliage wires are down they're kept neatly in place and away from any machinery. **Chris Rieck** – Vineyard Manager at Byfarr Wines Victoria, Australia

We chose the **Vini-Clip** system for our foliage wire management. Ian has always been timely and easy to work with, and the clips of course are tremendously easy to install with 50mm type 17 hex-head screws and a decent cordless impact driver. They are easy to install, clip and unclip and most importantly allow us to manage our foliage for high value wine production.

**TESSA BROWN** – Owner & Winemaker  
@ Vignerons Schmolzer & Brown, VIC, Australia
